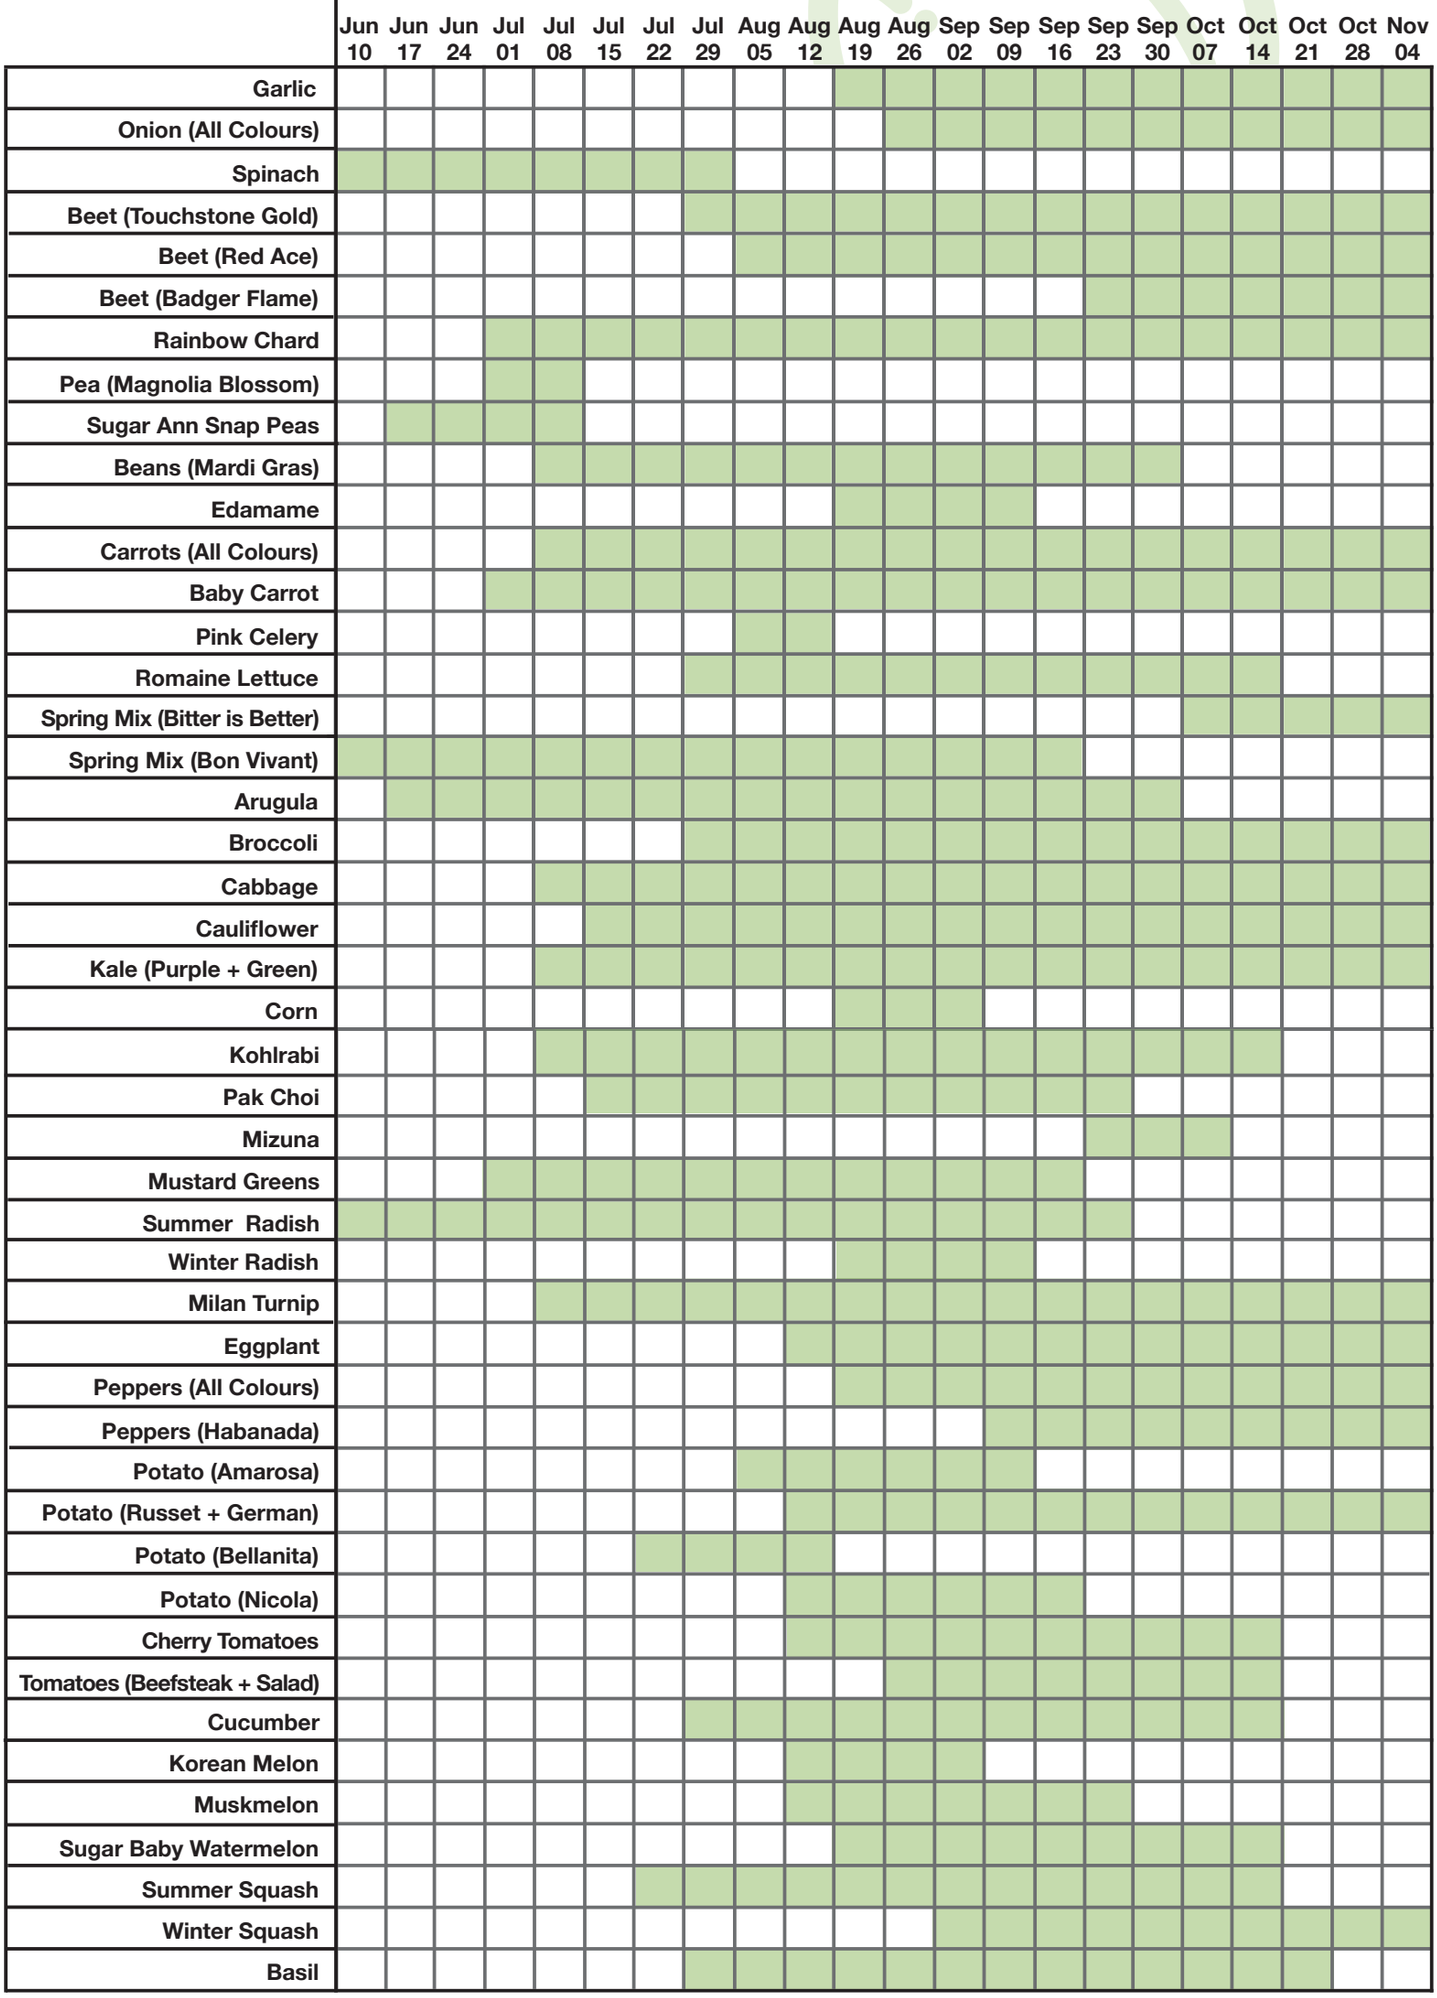
URBAN ROOTS LONDON

Harvest Estimate 2019

Urban Roots London is a non-profit organization which focuses on two things: using vacant city spaces to produce food, and strengthening community connections.


At least a third of our produce is donated to our not-for-profit community partners; at least a third is sold at affordable rates to social enterprises and at our farm gate markets; and at most a third is sold to local restaurants and businesses within London. This is our Model of Thirds.
